DATABASEFILE

FINDINGS

- **SOME FINDINGS WHERE:**
- Employees contributed differently to overall sales, with clear top performers.
- A handful of customers accounted for the majority of revenue.
- Monthly sales showed seasonal fluctuations, especially in 1997.
- Order fulfillment times varied depending on year-specific shipping rules.
- Some product categories had no sales at all, highlighting gaps in demand.
- London-based customers generated measurable but uneven sales totals.
- Certain customers placed multiple orders on the same date, showing loyalty or urgency.

CHALLENGES

- **SOME CHALLENGES WHERE:**
- Adapting queries to the exact field names in the database was tricky.
- Handling missing or incomplete data required assumptions.
- Calculating fulfillment times needed conditional logic for different years.
- Percentile ranking required advanced SQL functions not always intuitive.
- Joining multiple tables correctly was a recurring challenge.
- Ensuring accuracy in discount calculations demanded careful rounding.
- Grouping by country and category sometimes produced duplicate rows.
- Year-over-year growth calculations needed precise handling of division by zero.
- Identifying products never reordered required exclusion logic.

An aerial photograph of a multi-lane highway bridge spanning a body of water. The bridge has several lanes in each direction, with white lane markings. Several vehicles, including cars and trucks, are visible on the bridge. The water is a deep teal color with visible ripples. The text "THANK YOU" is overlaid in the center of the image in a white, serif font. A thin white horizontal line is positioned below the text.

THANK YOU
